Project Details (Latest project in top)

1) Infosys - Kuehne+Nagel - Automated Export System

Project Name : Automated Export System

Applications : AES, SLI-POA

Client : Kuehne+Nagel

Duration : 22 Months - Till Date

Project Site : Offshore

My Role : Systems Engineer

Project Details:

The Automated Export System(AES) is an application for exporting goods from US which is electronically filed with US Customs and Border Protection (CBP) and US Census Department. AES will receive Internal Transaction number (ITN) as a response from CBP to process the shipment.

The Shipper's Letter of Instruction(SLI) and Power of Attorney(POA). A shipment which needs to be filed should have a SLI or POA. Internal Transaction number (ITN) as a response from CBP to process the shipment. SLI document should be attached to every shipment which are processed, which will contain all the details of the Shipper, Consignee, Commodity. The SALOG tracking number and the SLI tracking number should match so that it can be accessed in AES for processing. POA is an authority given to KN by the Customer to process the shipment under its Name.

My Roles and Responsibilities:

- ❖ Requirement gathering from Client Manager.
- ❖ Involved in solving the tickets and in preparing the test cases.
- ❖ Involved in the front end and back-end development of the application.
- ❖ New module development and its unit testing with required data setup.
- ❖ Identifying, providing analysis and Fixing the Bug.
- ❖ Coordinated with my team members in solving Project related issues.
- ❖ Connecting with end users and resolving their queries and issues during Support.
